Is Sedation For You?

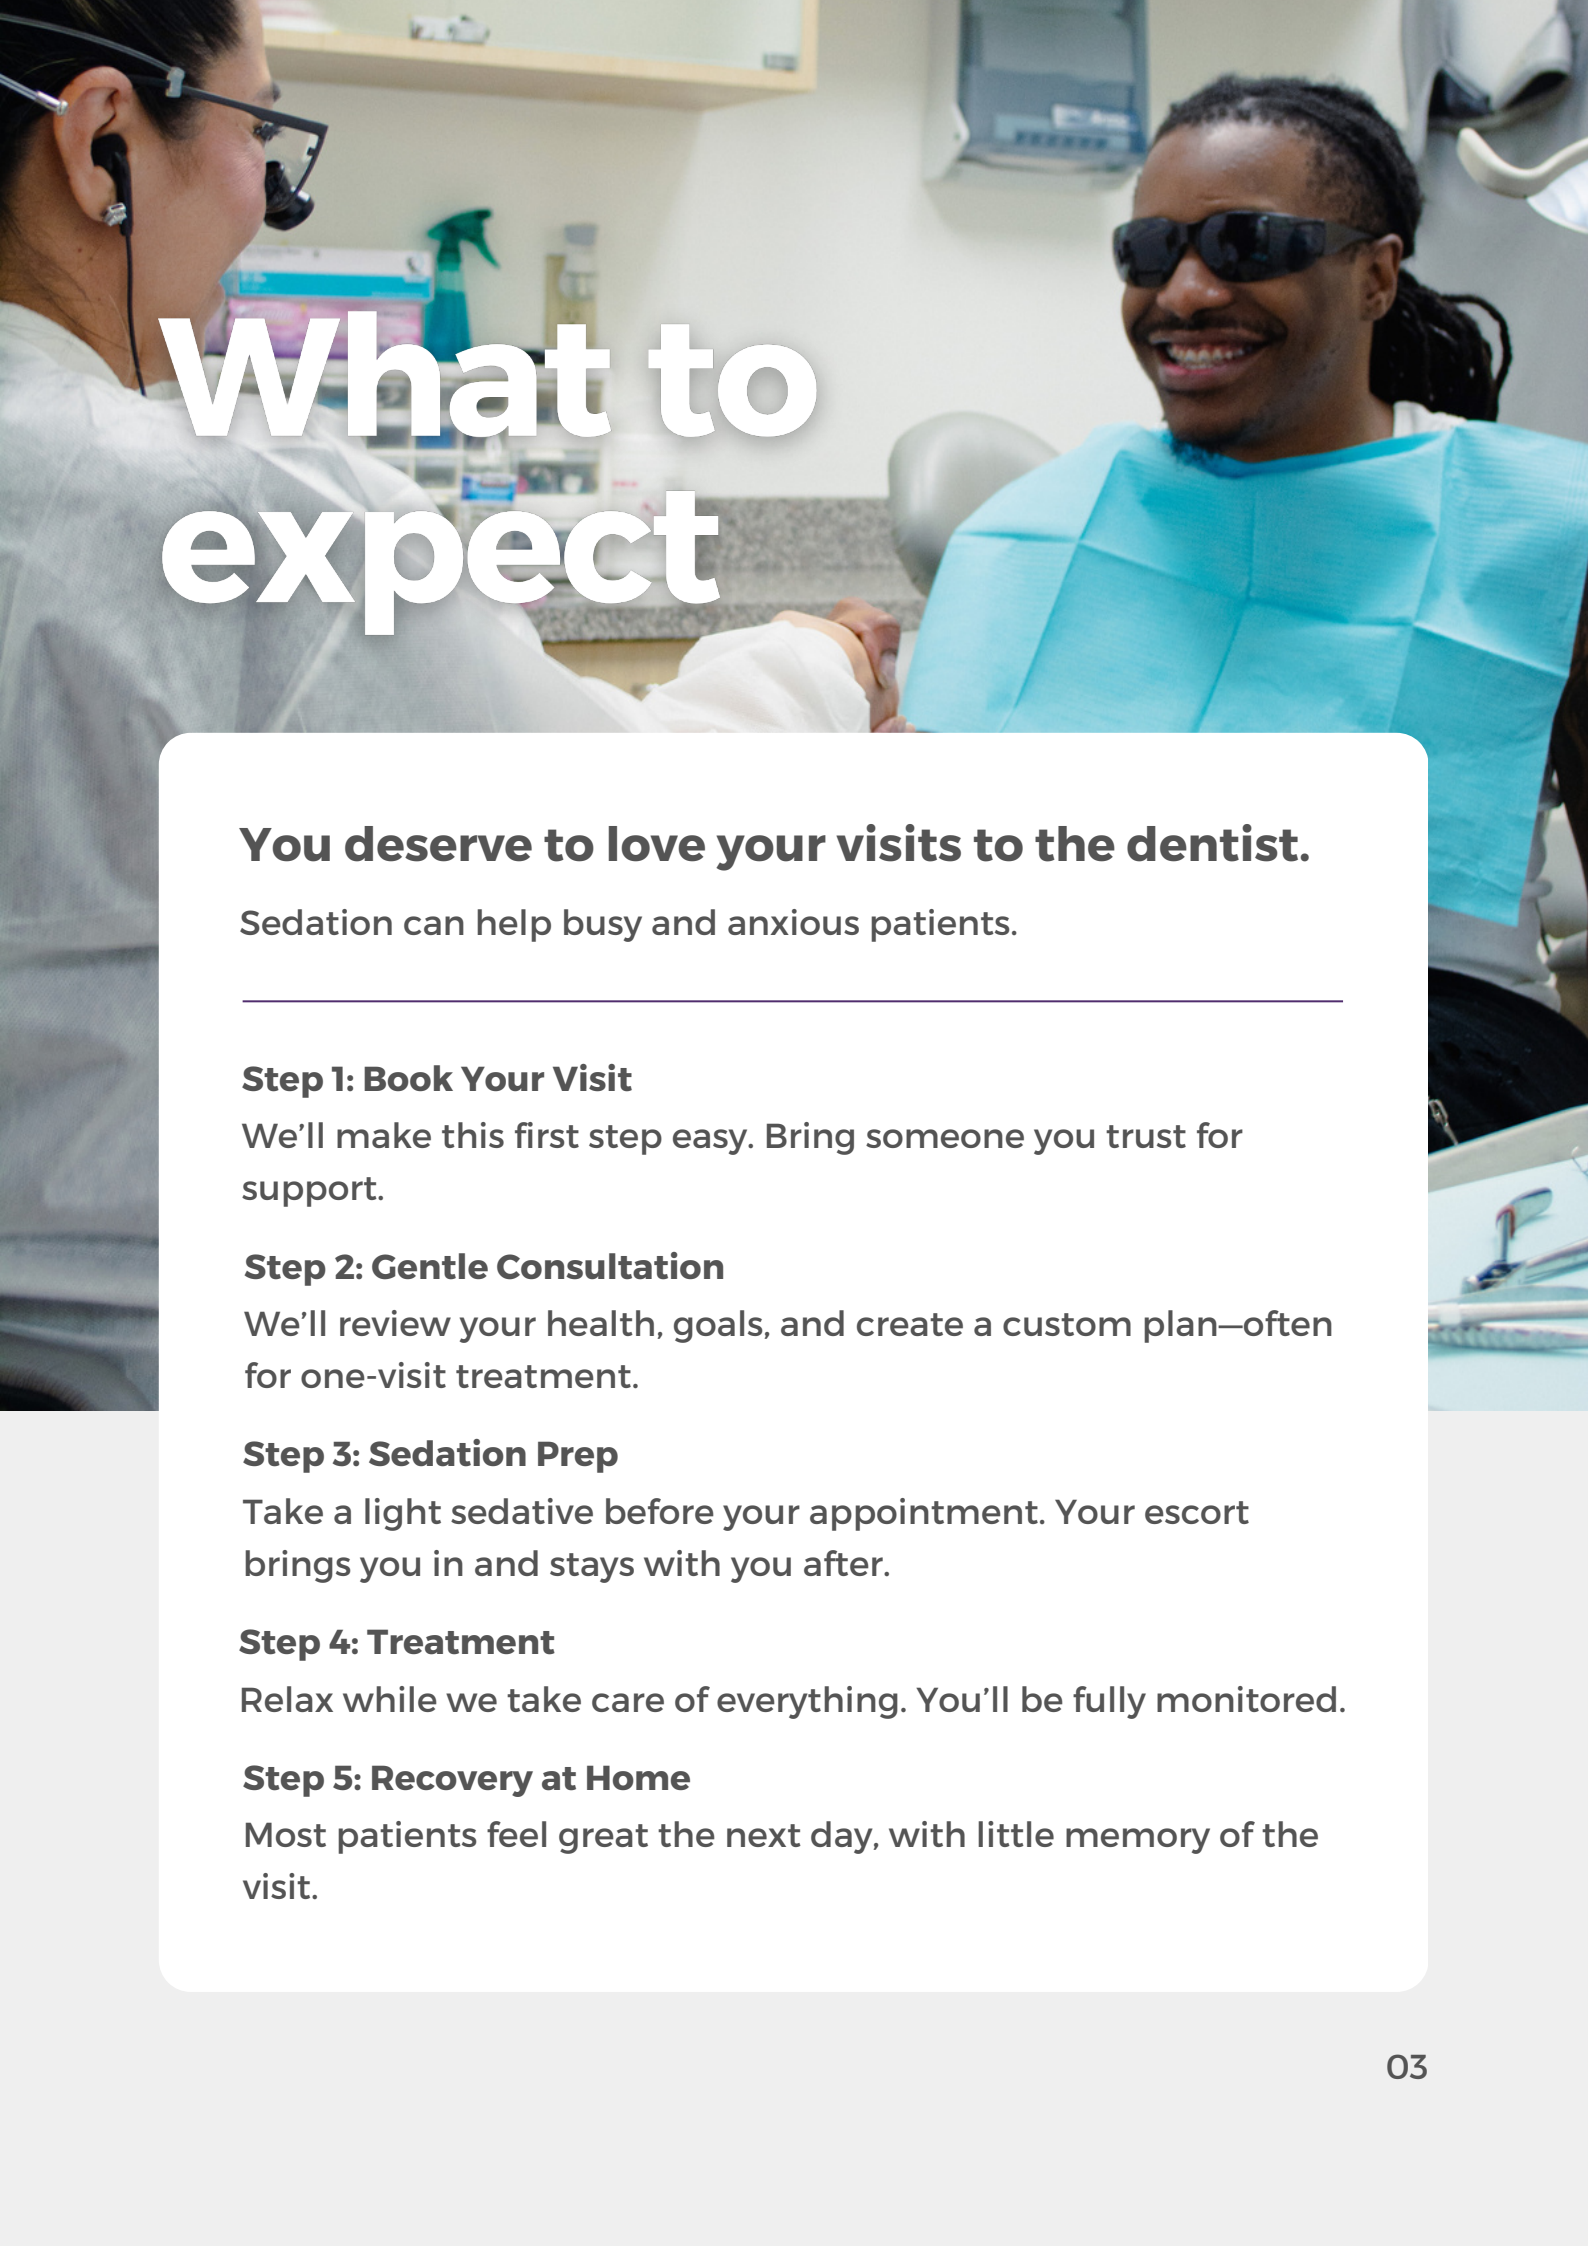

Sedation dentistry is safe, effective, and designed to make your visit feel stress-free from start to finish.

If fear, anxiety, or a busy schedule has kept you from getting dental care, sedation can help.

We make the process simple and safe—so you can get everything done in one visit.

Is sedation right for you?

- You're busy and want to complete your treatment in fewer visits.
- You feel anxious or afraid of dental appointments.
- You've had negative dental experiences in the past.
- You're sensitive to pain or discomfort during treatment.
- You have trouble sitting still or a strong gag reflex.

What to expect

You deserve to love your visits to the dentist.

Sedation can help busy and anxious patients.

Step 1: Book Your Visit

We'll make this first step easy. Bring someone you trust for support.

Step 2: Gentle Consultation

We'll review your health, goals, and create a custom plan—often for one-visit treatment.

Step 3: Sedation Prep

Take a light sedative before your appointment. Your escort brings you in and stays with you after.

Step 4: Treatment

Relax while we take care of everything. You'll be fully monitored.

Step 5: Recovery at Home

Most patients feel great the next day, with little memory of the visit.
